Specialty Occupational Medicine
8/6/2007

Investigation Result

Physician Review

My Assessment In my opinion, with a reasonable degree of medical certainty

The reviewed medical documents do not demonstrate that [redacted] was, after 4/6/2006, physically incapable of performing sedentary work activities. Based on [redacted] medical history restricting the activities of standing, walking, climbing, stooping, kneeling, crouching or crawling is medically reasonable.

Chronic opioid use does not preclude non-safety sensitive work activities these records do not contain a complete mental status examination and/or neuropsychological testing demonstrating that [redacted] is cognitively impaired as to preclude working.
